Super mechs 3 y8

Customize your designs and trendy conflict bots, fight against others and upgrade your war robots with super MECHS, a strategic shooter with always fun addictions! To choose the details and build your very first robot that will carry them to an empty platform, you are going to be in a position to join the rivalry with other war robots and also make cash for those upgrades. Choose acceptable weapons and strive to do the most damage to your competitors. You may want to approach the target or take a step back to improve accuracy much more. While fighting, you must look carefully at this sign on the head: hit points, energy and heat. Energy is absorbed by carrying out certain activities and using weapons. Heating occurs from the shooting weapon, and the robot automatically powers down even if the engine overheats.
