Amazon prime now delivery tips

Delivering groceries to your home becomes a regular way to shop for many of us. Now more than ever, stores are partnering with grocery delivery services or offering their own. Among them is Amazon Prime Now. In this article, I'll look at five things you need to know before placing your first order on Amazon Prime Now. I recently ordered groceries from Whole Foods using Amazon Prime Now to share my experience with you and give you some tips on how to use the service. 5 Things to Know About Amazon Prime Now If you're a member of Amazon Prime, you can now access same-day delivery via Amazon Prime Now. With Prime Now, you can shop for groceries and other basic products and deliver them directly to your home. In addition to your Amazon Prime membership fee, there are no additional costs to use the service as long as you meet the minimum order \$35. If your order amounts to less than that, you will pay \$4.99 for delivery. If you're thinking about ordering through Amazon Prime Now, here are a few things you need to know before you start: Content in each section, you'll find detailed information about Amazon Prime Now, including a step-by-step guide to placing your first order. Ultimately, it should be easy to decide whether the delivery service is right for you or not. Amazon Prime Now is a same-day delivery service that is exclusive to Prime members. In addition to groceries, you can get tens of thousands of everyday essentials delivered, including electronics, clothes, personal care items and even toys. Depending on where you live, you can order from local stores such as Fresh Thyme, Bristol Farms, Bartel Drugs and Westside Market. In many areas, Prime Now also offers grocery delivery and delivery from Whole Foods. In fact, ordering from Whole Foods was the only option in my area. Once you select a retailer and place your order, a personal shopper will pick up your items, notify you of any replacements or products depleted, and deliver your order during a time slot you choose. To see if Amazon Prime Now is available in your area, visit the website and enter your zip code. How does Amazon Prime work now? Amazon Prime Now works by connecting Prime members with personal shoppers who are employed by Amazon. Your shopper will pick up your products from Amazon, Whole Foods or another local retailer and deliver them to you. Before you start, make sure Amazon Prime Now is available in your area. Once you've confirmed that it's true, follow these steps to place your first order: Step 1: Sign in or Download the app You can visit Amazon Prime Now online or download the Prime Now app (iOS and Android) and enter your zip code to get started. While you can browse as a guest, you will need to in your Prime account before you sign out. I recommend logging in as soon as you download the app or do so on the website to get it out of the way. Once inside, you will be able to choose between the stores you want to shop. In many areas, you can choose between Amazon or Whole Foods. If you shop on Amazon, you'll find more access to household basic and non-food products. If you're shopping for groceries only, keep in mind that Prime members get exclusive savings online at Whole Foods, making it a great option, if any. In my area, Whole Foods was the only option available. So when I logged in, I only saw groceries from there. Once you've selected your store, you're ready to start shopping. You can view items by category or search the entire selection. If you shop at Whole Foods, you can click on Best Members save more for the best deals. While finding groceries and products you want to buy, you can click add to add them to your shopping cart or click on the product photo for more details. If you scroll down the product page, you'll see feedback from other customers. I found that they can be really useful for reading. I almost bought a watermelon without realizing it was a small size, and many other customers said they had made the same mistake. Luckily, I managed to avoid it after reading their reviews. Step 3: Select your delivery time and place your order after you have added all the products you are buying, click your shopping cart to check. Review your list and make the necessary changes. At the top of the screen, you'll see that substitution is allowed for each item by default. You can select the check box that says Leave all unavailable items if you don't want any substitutions. Or you can check Sign out if they're not available under individual items if there are only specific products that you don't want replaced. If you choose to allow substitutions, your personal buyer will send you a message to confirm the next best item they have selected. If you do not allow substitutions, your buyer will skip the item and the total price will be adjusted. Once you've selected your replacement preferences and confirmed that your order is correct, click Continue to pay. On this page you will be able to select the delivery address and delivery time, enter your mobile number, leave delivery instructions and enter your payment method. I planned my delivery within two hours later that day. Also, I can schedule it within an hour window for an additional delivery fee of \$4.99. Once you have confirmed your order details on this page, you can click Order. You will immediately be redirected to the order tracking page, where you can see the status of your order. Step 4: Receive the delivery After you have placed your order, you can check its status at any time online or in the Prime Now app. If you've entered your mobile number, you'll also get text updates when shoppers start working on your order. If there are any replacements to confirm, a signal that your order is on the way and another update when it's delivered. My order was delivered in the first time frame I had chosen. From the time someone started shopping for my order to the moment it was delivered, a little more than an hour had passed. Since I had ordered perishable (specifically ice cream), I was a little worried. But the brown bags in which the food came included in insulated heat bags that keep the food fresh and frozen. I was also impressed with the quality of the selected food and nothing seemed like something I would not choose. How much is Amazon Prime worth now? Although there is no additional subscription or monthly fee for Amazon Prime Now, it is only available to Prime members. One Amazon Prime membership fee is \$12.99/month or \$119/year. If you shop at Amazon or Whole Foods, you can avoid a \$4.99 shipping fee by placing an order that is at least \$35. The minimum order amount for free shipping varies at other local retailers available on Prime Now. If you select a delivery window for one hour, you will have an additional fee of \$4.99, even if you have met the minimum required amount. You can avoid this fee by selecting a two-hour delivery window. The tips are optional and are different from the delivery fee. By default, the advice is \$5, but you can adjust it at the time of payment. In addition to a potential delivery fee and tipping amount, you should not have any additional fees. As for product prices, I found that Amazon Prime members are entitled to exclusive savings online at Whole Foods, making it a great shopping experience on Amazon Prime Now. Amazon Prime Now vs. No. Both services are available online and as apps for iOS and Android devices, but you'll need to request access to be able to shop through Amazon Fresh. Both services partner primarily with Whole Foods and offer groceries, personal care and household needs. You can order your order on the same day with either. Overall, you can expect a \$4.99 shipping fee or free shipping on orders over \$35 with each service as well. When it comes to replacements, Amazon Prime Now offers more flexibility than Amazon Fresh. With Prime Now, you'll be able to choose which items you want to replace, and the personal buyer will contact you to confirm the changes. With Amazon Fresh, you can't approve changes and disable substitutions of certain items. Unfortunately, Amazon Prime Now is not as widely available as Amazon Fresh. Prime Now is available in over 100 major cities in the United States, but Amazon Fresh is available in more than 2,000 cities and cities. Pros "Cons" on Amazon Prime Now In general, Amazon Prime Now offers a reliable delivery service that brings groceries and household essentials right by your door. However, there are several drawbacks to ordering your purchases online. After I use Amazon Prime Now, here are the biggest pros and cons I found: Pros: Amazon Prime Now certainly helps you save time shopping for groceries other household items. You can place your order from your phone or laptop, receive updates and get your delivery without having to leave home. This also means you'll be less tempted to make impulse purchases. Same-day delivery: You can receive your purchases for an hour after you have placed your order. You can also schedule your order in advance to get it at a time convenient for you. Outstanding savings at Whole Foods: Prime members are entitled to exclusive savings at Whole Foods and I found them worth taking advantage of. Quality of delivery: I liked that my order was delivered in insulated bags that kept the ice cream frozen and the meat and fruit fresh. Besides, everything was out of contact and I was able to track the progress of my order all the time. Cons: Availability: Unfortunately, Amazon Prime Now is currently only available in selected major U.S. cities, and some locations have limited store options. When I made my order, I couldn't even order directly from Amazon; Whole Foods was my only option. Required membership: If you're no longer a primary member, I wouldn't necessarily recommend signing up for a Prime Now-only membership. However, if you're already a prime member, it's a free service worth using. I had a lot of experience with Amazon Prime Now. The site was more convenient for me than the app was, but both were easy to navigate. I was also pleased with each of the products that my personal shopper had chosen. The quality of the food was excellent and I had no problems placing and receiving my order. Have you ever ordered purchases from Amazon? Tell us about your experience in the comments below!
